Word Level Instruction for Students with Dyslexia

COURSE MODULES

- Teaching Basic Parts of Speech: Helps educators understand how to provide targeted instruction in nouns, verbs, prepositional phrases, and adjectives.
- Developing Vocabulary: Introduces word knowledge as a foundation for comprehension, provides examples of interferences that inhibit comprehension, and suggests approaches to building students' word skills.
- Vocabulary and Comprehension: Explores how vocabulary and the other components of reading addressed in the course support comprehension, the ultimate goal of reading.

Understanding Receptive Language

COURSE MODULES

- Understanding Receptive Language: Introduces receptive language development, including information about the diagnosis of language disorders and research-based best practices for building language skills.
- Structure of Language: Explains the facets of language (receptive and expressive) and how they contribute to the effective comprehension and communication skills necessary to achieve successfully in school, suggesting an approach to informal assessment of student skill with different facets of language.
- Developing Listening Comprehension: Describes how this often assumed aspect of comprehension can interfere with learning, links listening comprehension to the previous and subsequent units, and offers practical instructional approaches to support and develop students' listening comprehension.
